

PROJECT OVERVIEW

The Zero Energy Idea House is an innovative demonstration project being constructed in Bellevue. Built by Issaquah-based Shirey Contracting, the project aims to increase awareness of products and systems that can help homeowners move toward energy independence. Located on the highly traveled West Lake Sammamish Parkway, the Zero Energy Idea House will blend cutting-edge green products and systems with inspiring and modern design elements.

The project will be thoroughly documented via a website (www.zeroenergyideahouse.com), progression and finish photography, educational presentations and media outreach, culminating in public and industry tours and events when the home is completed in Fall, 2008. Design decisions, product choices, and construction methods will be explained and shown, with resources provided for individuals wanting to learn more. Endorsed by Built Green®, ENERGY STAR Homes®, and the US Dept. of Energy's Building America program, the project has been selected for extensive 2008 year-long coverage as a showcase home by *425 Magazine* (www.425magazine.com).

Project Location

West Lake Sammamish Parkway, Bellevue, Washington
